SUMMARY

I'm a creative, detail-oriented software engineer with a strong interest in open-source software and artificial intelligence. Proven experience developing and deploying effective front-end and back-end web applications. Looking to work with a tech firm that develops cutting-edge software with a worldwide reach.

SKILLS

• **Languages:**	HTML, CSS, JavaScript/ES6+, EJS, TypeScript
• **Technologies:**	Node.js, Express, MongoDB, Tailwind CSS, React.js, Next.js, GraphQL, Bootstrap
• **Tools:**	Git, GitHub, npm, Visual Studio Code, Postman
• **Other:**	RESTful API Design, Figma

WORK EXPERIENCE

Software Engineer   **100devs**   2020 — Present
Los Angeles, CA

- Collaborated with a team of developers to build client prototypes as well as deliver projects built to modern and responsive web applications using best practices
- Pair programmed with new developers to ensure understanding of coding standards, expectations, and familiarity with internal tooling
- Applied SCRUM agile methodologies for project management to resolve complex problems and coding challenges

Full Stack Web Developer   **Guzman's Creative Consulting**   2020 — Present
Los Angeles, CA

- Created full-stack web applications and static websites for various clients across small and medium-sized businesses
- Consulted on SEO and social media strategy
- Some clients included:
  - Thuyen Vien Vietnamese Vegan Restaurant
  - Cherry Poppin Lips and Lashes

Customer Service Supervisor   **MarineDepot.com**   2015 — 2019
Garden Grove, CA

- Led a team of 8 customer service agents and achieved the Platinum Bizrate Circle of Excellence award for 2017 through 2019
- Reduced customer service agent email load by 20% by actively updating product data on the SQL Server using a bespoke content management system

PROJECTS

Ivanguzman.dev
Personal website written in Next.js, Tailwind CSS, TypeScript, GraphQL

- Curious about Next.js and GraphQL I ended up researching, reading through documentation and tutorials to create a responsive and modern personal portfolio. Plus, the blog utilizes the GraphCMS API integration for writing ease of use.
- Designed the wireframes for the website with Figma. I went through four design iterations to ensure the website had transparent UI/UX

Pronto Coffee Co
Full-Stack app written in EJS, JS, Tailwind CSS, Node.js, MongoDB, Express

- A cashier can take coffee orders from the POS to be sent to the baristas that include customer's name
- Baristas can log in to the app and see orders that have been made, which orders are pending in the queue as well as mark orders as completed. Completed orders will note which barista finished the order.

Coin Forge
Front end app written in React and MaterialUI

- A minimal font end app that consumes the CoinGecko API where users can search for their favorite cryptocurrencies
- Users are also able to view coin history with beautiful graphs thanks to the use of chart.js

Other Projects: Travel vacation homes and rental landing page, Star Trek Federation field guide to aliens with custom built API, and many more

Open-Source Contributions: Tailwind CSS

VOLUNTEER WORK

Just Do Good   Compton, CA   2019 — Present

- Helping southern Los Angeles communities by cleaning the neighborhood and painting homes, schools, and churches
